2nd International Course in Oculofacial Plastic Surgery and Orbital Surgery

Full Hands-On Dissection Course with Fresh Cadaver Specimens

Medicine School,
Universitat de Barcelona - Campus Bellvitge
8 May 2026

Theory and dissection on cadavers

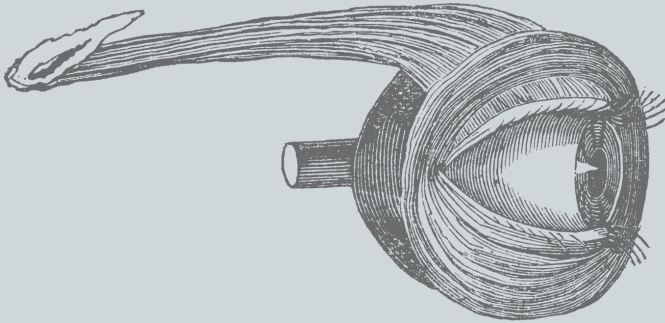

The eyelids and orbit have specific pathologies that require tailored approaches. A thorough understanding of the anatomy of all their components is essential to effectively address these conditions.

Moreover, the orbit has become a gateway to other anatomical areas, such as the paranasal sinuses and the base of the skull.

Directors

· **Dr. Jessica Matas**
Ophthalmology

· **Dr. Camilo R. Van Strahlen**
Otorhinolaryngology

Faculty

· **Dr. Isam Alobid**
ORL

· **Dr. Joaquim Enseñat**
NCR

· **Dr. Mauricio López**
ORL

· **Dr. Alberto Di Somma**
NCR

· **Dr. Óscar Felguera**
OPH

· **Dr. Carlos Milla**
OPHT

· **Dr. Fran Cuesta**
CMF

· **Dr. Núria Ibáñez**
